**DATE:** December 10, 2015

**SUBJECT:** PGD Tower Radar Display

**TO:** All Punta Gorda Airport Tenants/Customers

**FROM:** Richard Reid, ATM  
Punta Gorda FCT

To all Punta Gorda Airport Customers,

The Punta Gorda Tower radar display is finally here!! This week (December 7-11) the equipment is being installed, tested, and signed off for use by all the parties involved. It has been a long time coming as most of you are well aware. I cannot stress how thankful we are for the efforts of the Airport Authority in not only funding the project, but pushing to get it here and installed. The official implementation date for use is Monday, December 14, barring any unforeseen problem.

The new equipment will certainly add a level of safety to the airspace, and in addition, a level of improved service to all customers as we continue to grow. We have worked out some new procedures with our approach control in Fort Myers as well to facilitate the use of the new equipment, which we believe will help expedite the flow of both IFR aircraft and VFR aircraft. As always, we welcome visitors to the tower, especially those that have yet to do it or those that have never seen our facility.

We wish you and your families the very best holiday season and look forward to "seeing" you soon.

Richard Reid  
ATM Punta Gorda FCT
