

APPENDIX B
Airline Correspondence

June 27, 2017

Ron Mallard, COO/Director of Aviation
Charlotte County Airport Authority (PGD)
28000 A-1 Airport Road
Punta Gorda, FL 33982

Ron,

Pursuant to our discussions about Allegiant's future plans at PGD and the future need to increase utilization of the alternate runway while the primary runway undergoes rehabilitation, I would like to go on record regarding runway length requirements for Runways 4/22 and 15/33.

In order to serve future markets, we need a minimum runway length of 7,920 feet for Runway 4/22. Given the restraints for extending Runway 15/33, and given that this is the alternate runway, we need a minimum of 6,200 feet.

Please let me know if you have questions about these requirements. Thank you for your continued partnership and support of our growing operations at PGD.

Sincerely,

A handwritten signature in black ink, appearing to read "TK", written over a light blue horizontal line.

Thayne Klingler
Director, Airports
